

2. Input set 2

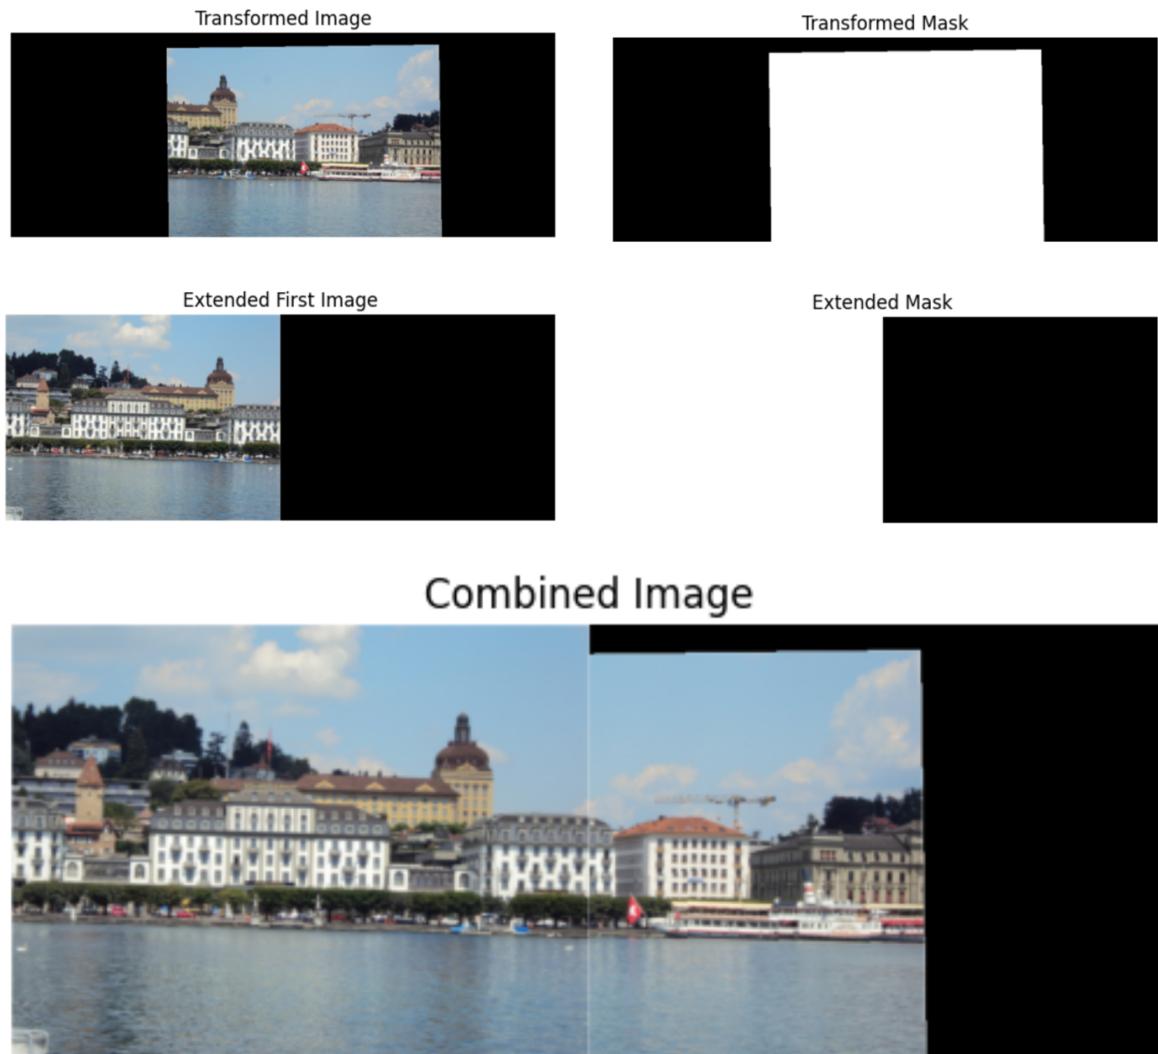

Step 1 & 2:

Step 3: Shows the matched keypoints.

Step 4 & 5: The same problem is also happening in this example. Again, combined image is panoramic so it gives us the image we wanted.

Conclusion

I think this project was both entertaining and challenging. The explanation of the question was clear, and I think I did a good job even though I had difficulties while doing this assignment. I have learned what SIFT algorithm does and how to stitch images. To be honest, I am really impressed by this topic, and I will be working on this. As a final remark, I hope I can use what I have learned in this project in the future.
